

Safety Suite for Higher Education

Intrado has leveraged over 40 years of 911 innovation and expertise to design the most advanced set of school safety solutions available for campuses. Intrado Safety Suite addresses emergencies from every angle with an end-to-end safety management platform, making campus safety management easier, crisis communications more effective, and emergency dispatch faster and more accurate.

Swift Response, Safer Campus

Intrado Safety Suite is an end-to-end incident management solution designed for campus officials to prepare for, respond to, mitigate and recover from events with a comprehensive set of tools built for keeping students, visitors and staff safe.

- Unified “hub” to manage disparate on- and off-premises devices and systems – ranging from IP to analog systems.
- Multiple trigger options via web-based cloud app, feature-rich mobile app, physical panic buttons, IP phones, contact closures, and more to empower personnel with the ability to quickly activate alerts, lockdown a building, or silently notify 911 dispatchers.
- Customizable notifications to address a variety of incidents including active shooter, emergency weather, suspicious activity, medical events, and more.
- Real-time staff finder and drill management.
- Store and share floor plans, SOPs and ERP checklists.
- One and two-way chat with the ability to add images and videos.
- Critical event information delivered direct to 911 emergency dispatchers through the ALLI stream.

Intrado Safety Suite is comprised of best-in-class solutions that bring unrivaled protection when used in concert with each other.

Intrado solutions are backed by an unmatched position in the 911 ecosystem, ensuring emergency requests for assistance reach the right first responders quickly with accurate location and incident details.

40+

Years of 911 innovation and expertise

6000+

Connections to PSAPs across North America

410M+

911 requests for assistance delivered a year

Unified IP-based Alerts, Automated Announcements, Paging & Notifications

Manage communications and broadcast messages – to all on-campus screens and IP-based endpoints or create geofenced parameters for custom alerts in localized areas such as dormitories, specific buildings, rec halls, and more – all from a central notification management hub.

- Computer desktop takeovers for emergency alerts.
- Feature-rich mobile application providing authorized personnel to activate a notification or request assistance – *giving users the flexibility to manage incidents regardless of whether they are on- or off-campus.*
- Quickly address severe weather, hazardous conditions, or any other emergency scenario.
- Leverage existing IP devices like phones, speakers, and desktops for paging and notifications.
- Easily manage automated announcements and drills across campus buildings.
- Alert visual display boards, TV monitors, strobe lights, and PA systems to help staff, visitors, and students visually understand emergency broadcasts.
- Integrates with fire alarm panels and security systems for added safety and security.

Panic Buttons in Many Form Factors

You never know where you may be when an emergency strikes, which is why it's important to have multiple ways for authorized users to trigger an event and request help. Safety Suite offers a variety of panic buttons – including physical / wearable, mobile app, and desktop options – giving schools peace of mind knowing that faculty are covered, regardless of where they are located on campus. With (silent) panic buttons, users save valuable time by automatically transmitting critical data – including location, incident details, floor plans and more - to staff, security officers, and local 911 dispatchers.

- Mobile App – Customizable silent panic button options make it a fast way to request assistance.
- Cloud App Browser Interface – Authorized personnel can simply log in and activate a notification using customizable buttons within the cloud app.
- Wearable Panic Button – Multiple connectivity options including WiFi, BLE, & Cellular/LTE to ensure faculty can request assistance wherever they may be located on campus.
- Desktop Application – Great for stationary users like office/admin workers using PC or Macs.
- Mounted panic buttons – Integrate IP & analog panic buttons (under the desk, wall-mounted, etc) with Safety Suite for a comprehensive incident management solution.

Enterprise 911 – Ensuring the Call for Help Gets Out

E911 services automate and simplify call routing and location management for FCC and state mandated E911 compliance. Intrado's E911 solutions help campuses:

- Comply with all state and federal regulations including Kari's Law and RAY BAUM's act.
- Ensure 911 calls are quickly routed to the proper jurisdiction and include precise dispatchable location data.
- Provide connectivity to over 6000 Public Safety Answering Points (PSAPs) across North America.
- Integrate and interoperate with all major IP-PBX platforms for seamless integration and interoperability.

For a truly complete and integrated approach to safety threat response, make Intrado Safety Suite a central piece of your emergency response strategy.

About Intrado

Intrado is the essential partner for those committed to saving lives and protecting communities anywhere in the world. As a leading global provider of trusted emergency response solutions, Intrado improves public safety outcomes by connecting help to those in need. The company blends legacy intelligence, modern technology, and passionately dedicated people to create end-to-end solutions that are innovative, resilient, intuitive, and insightful.
